### Produktbeschreibung

FT 16 X 29mm Shock Kit Hard anodized, threaded 16mm aluminum shock bodies. Extra-large shock bladders to allow full volume compensation. Heavy-duty 4 mm stainless steel shafts Shock boots. Uses existing RC8 shaft and eyelet. Factory Team Gold shock shafts included. Comes with tunable pistons (pre-dimpled). Aluminum Caps for durability with drilled bleed hole that makes for easy bleeding and adjustable rebound. EZ Grip knurled shock collars. Improved shock boots design that won't tear and allows easy installation of the spring cup. Boots also have built in rubber bump-stops.

**Benefits** Increased stability in rough sections. Softer landings on big jumps. More predictable in the corners. Large oil volume reduces the effect of heating up during a main event. Uses lighter oils for same feel, light oils last longer and stay more consistent in varying temperatures.
