Produktbeschreibung

Factory Team Aluminum Bellcrank Set. Team Associated's Factory Team Aluminum Bellcrank Set is a direct replacement bellcrank for the B4, B4.1, T4, T4.1, and 2WD electric SC10 lines of vehicles. Under its cool blue-anodized skin is CNC 6061-T6 aluminum, which promotes durability and improves steering response and consistency. The precision bearing fit reduces excessive steering linkage free play, while the lightweight design keeps weight to a minimum. **Note:** Due to the servo saver feature being removed from this aluminum bellcrank design, it is highly recommended that a premium-grade, full metal-gear servo be used when installing this product. When installing this aluminum bellcrank on a B4.1, T4.1, or 2WD electric SC10 RTR product, #3971 ball bearings are required. For B4.1, T4.1, and 2WD electric SC10 Factory Team Kits, the kit ball bearings should be used.
