Produktbeschreibung

Features:

- No modification to the drone itself
- Long range extension without external boosters
- Design does not contain any removable parts
- Complete solution
- Controller NOT included

Mantis Q and Mantos G – the foldable and convenient travel drone for small and big adventures alike. It listens to you thanks to voice control, and the visual tracking will let it follow you wherever you go. Whether you're backpacking in Thailand, on a road trip through the South or with your family at the beach, Mantis Q's energy-efficient design keeps in the air for up to 33 minutes and provides you with extraordinary photos and video clips from above..

4Hawks antenna for Yuneec Mantis Q & G model is highly advanced, operating in both 2.4GHz as well as 5GHz frequencies with 8 and 10 dBi gain. The concept behind the look of the antenna was to keep the main merits of Mantis Q, which is its compact size. Entire construction is 100% UV protected to assure longevity of the equipment. Mounting is made of stainless steel for rock solid stability. Mounting the range extender leads to permanent changes with the remote controller. The entire set is lightweight and uniform (without any

loose equipment pieces). Changing the direction of the antenna shouldn't cause any difficulties, as the system was designed in a way that allows quick position change with just a single "click". This way you can be sure that you do not lose the connection with your drone.
